Professional Summary

Aspiring Software Engineer with a strong foundation in C++, java and Data Structures & Algorithms. Passionate about solving real-world problems, creating responsive web applications, and contributing to innovative technology solutions. Seeking an entry-level role to further develop skills in software development, salesforce development, system design, and emerging technologies.

Education

Jaipur Engineering College & Research Centre — Jaipur, Rajasthan
Bachelor of Technology, Computer Engineering | CGPA: 8.74/10 | July 2024 – April 2028

Sanskar Public sr. sec. School -- Jaipur, Rajasthan
Higher Secondary (XII) | Percentage: 93.20% | April 2023
Secondary School (X) | Percentage: 92.00% | April 2021

Technical Skills

- **Programming Languages:** C, C++, Java
- **Frontend Technologies:** HTML5, CSS, React
- **Backend Technologies:** Node.js,Express.js,RESTful API's
- **Database**: MySQL, Database Schema Design
- **Operating System:** Windows, Linux(RHEL)
- **Version Control:** Git, GitHub
- **Problem-solving:** Data structure and algorithms

Work Experience

Software Developer Intern
Company: (HdMediaNetworks) | **On-Site** | **May 2025**

- Developed and maintained backend modules using Django, focusing on scalability and secure architecture.
- Enhanced database operations by implementing optimized MySQL queries and schema refinements.
- Built and integrated RESTful APIs enabling smooth data exchange between frontend and backend.

Front-end development Intern
Company: (HdMediaNetworks) | **Remote** | **Dec 2024**

- Developed and maintained user-friendly web applications using HTML5, CSS3, JavaScript, and React.
- Built responsive interfaces for multiple projects, improving mobile compatibility by 20%.
- Collaborated with backend teams to integrate APIs.

Projects

Expense Tracker :

- Developed a personal finance management web app using Django, enabling users to track daily expenses with categorical and time-based analysis.
- Implemented dynamic expense charts and data visualizations for better financial insights using Django templates and chart libraries.
- Automated calculations like monthly totals and category-wise expense breakdowns to enhance user decision-making.

Resume Analyzer :

- Developed **Python Flask** web app "Resume Analyzer" to extract skills from PDF/DOCX resumes and match with job descriptions.
- Built an interactive **dashboard** with **HTML, CSS, Bootstrap**, and **charts** to visualize skill gaps and comparisons.

ChatBot App:

- Built a smart chatbot that identifies spelling errors, extracts user intent, and provides correct responses using pattern recognition techniques. Improved user interaction by enabling flexible input handling and robust response generation.

Certificates

- Postman API Fundamentals Student Expert
- Entrepreneurship and IP Strategy (NPTEL)
- Privacy and Security in Online social media (NPTEL)
- SQL and Relational Databases (IBM)
